

CASE STUDY

FOOD DISTRIBUTION

SupplyOne partnered with a regional winery to improve bottle protection, shipping consistency, and packaging presentation. The engagement focused on evaluating corrugated designs, protective inserts, and scalable configurations to support multiple fulfillment channels.

OVERVIEW

A regional winery required protective packaging that ensured bottle safety while maintaining a premium presentation. Inconsistent packaging across order types created inefficiencies in fulfillment and increased risk during parcel transit.

THE SOLUTION

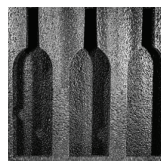

SupplyOne developed a standardized wine packaging solution focused on improving bottle protection and ensuring consistent performance across fulfillment methods.

Engineered bottle-specific corrugated designs to enhance compression strength and improve transit durability.

Consolidated multiple order formats into optimized shippable designs to reduce SKU complexity and streamline fulfillment.

Designed protective inserts to secure bottles, minimize movement, and reduce breakage risk during shipping.
