

# CASE STUDY

## SUSTAINABILITY

SupplyOne partnered with a beverage distribution company to address excessive packaging material use, high waste, and damages from inconsistent wrapping processes.

## OVERVIEW

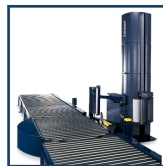

A major distributor of canned and bottled beverages implemented automated stretch wrapping equipment reducing film usage by up to 50%, while lowering costs, minimizing waste, and advancing sustainability through more efficient operations.

## THE SOLUTION

SupplyOne partnered with the customer to implement automated equipment solutions focused of efficiency and sustainability.

SupplyOne's equipment specialists conducted a full assessment of current procedures and equipment performance.

Following the assessment, SupplyOne assisted the customer in implementing the new automated stretch wrapper using materials balanced for performance and sustainability.

SupplyOne helped the customer quantify time, cost, and material savings and provides ongoing equipment service, operator training, and material selection support.
