

CASE STUDY

BUILDING PRODUCTS

A leading metal processor serving the building products industry needed a supply partner that understood its products and operating model. SupplyOne developed a dependable inventory and supply program designed to reduce in-house assembly, improve product availability, and prevent costly disruptions.

OVERVIEW

The customer was experiencing inconsistent inventory levels, frequently running out of critical items while carrying excess stock of others. They needed a trusted partner that could maintain the right products, reduce on-site inventory, and support their day-to-day operational needs.

THE SOLUTION

SupplyOne implemented a tailored inventory and supply program focused on product availability, space optimization, and supplier consolidation.

Inventory Solutions for Metal Processors

**SupplyOne Partners With
You to Identify What's
Best for Your Business**

BUILDING PRODUCTS

\$100k+ Annual Savings

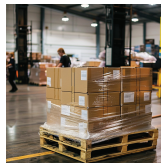

**70% Reduction in
In-House Assembly**

**SupplyOne improved inventory reliability
while reducing internal labor, excess stock,
and supply-chain risk.**

Strategic Inventory Management

SupplyOne helped maintain appropriate inventory levels for critical products, reducing stockouts while limiting unnecessary excess inventory at the customer's facility.

Reliable Product Availability

SupplyOne stocked key materials, including lumber, skids, and other essential products, helping ensure the customer had the supplies needed to keep operations moving.

Vendor Consolidation & Operational Support

By expanding the range of products supplied and serving as a dependable single-source partner, SupplyOne helped simplify purchasing, free valuable warehouse space, and reduce the customer's need for in-house assembly.
